

The it.com Brand Guidelines and Marketing and Positioning Suggestions

How to Express the it.com Domain on Your Website, Landing Pages, Social Networks, and Email

The it.com domain name is highly versatile and can be positioned in several ways.

We suggest that the domain name always be presented in lowercase to reduce possible confusion between the uppercase expression of the letter i (I) and the lowercase L (l). It can be capitalized at the beginning of a sentence. Still, we often express it as "***The it.com domain name...***" when describing the domain name so that it can be expressed in lowercase without breaking capitalization rules 😊.

LogoTypes

Our launch package offers an excellent set of logotypes for various backgrounds in .png and .svg formats. We ask that the logo always be presented using our standard blue color on a white background or vice versa (hex color #16184c or PANTONE color 2766 C).

Reasons Why Third-Level Domain Names (tlds) Should be Promoted

Third-Level domains have been part of the Internet since its inception. They are in line with the original intent of the hierarchical structure of the DNS and the Internet pioneer's idea of how domains would work. They are compatible with apps worldwide and have no problems regarding Universal Acceptance (UA). They work with email clients and apps worldwide with little or no modification.

Third Level Domains are Universally Accepted

Consumers face no problems using Third-Level-Domain. Jon Postel is one of the Internet's fathers, especially regarding the DNS system. In his October 1984 introduction of RFC 920, called "The Purpose of Domains, he wrote that the DNS should work as follows:

"The domain system is a tree-structured global name space that has a few top level domains. The top level domains are subdivided into second level domains. The second level domains may be subdivided into third level domains, and so on."

The above quote describes precisely what we allow you to offer in the it.com domain name! We expand the namespace on the Internet exactly how it was meant to be developed.

We conservatively estimate that at least six million ***developed*** domain names worldwide host their websites on domains like it.com (third-level domains). Moreover, these domains are compatible with ALL email servers and applications (many TLDs still are not).

Content Ideas for Marketing, SEO, and Sales Copy

The initials "IT" can stand for many things. Primarily we suggest targeting the global "Information Technology" audience. IT is often expressed globally as ICT (for Information, Communication, Technology), but the acronyms are interchangeable and understood universally.

The IT employment sector is a highly-paid audience interested and capable of purchasing domain names, often in bulk. They are also Internet savvy and in need of good domain names. By offering the it.com domain, you will find a large, lucrative audience.

Below, we offer ideas and information for sales copy regarding:

1. The IT Employment Sector
2. IT Abbreviations
3. IT Acronyms

Feel free to use this copy, or something similar, on your websites, landing pages, emails, or social networks.

IT Employment Sector

The worldwide full-time employment in the IT sector was projected to reach 55.3 million in 2020 (pre-corona estimation), an increase of 3.9 percent over 2019. Software developer/engineer, user support specialist, and systems analyst are three major job roles in the IT industry.

IT Pay

IT is one of the most in-demand and highest-paid professions in the world. The average salaries for IT professionals range from tens of thousands to over a hundred thousand dollars, depending on the region. Cloud computing is one of the most rapidly adopted technologies in today's information world, and those who work in this field are among the highest-paid IT professionals. Google's Professional Cloud Architect certification was the highest-paying certification among IT professionals worldwide in 2020.

Growing Demand for IT Professionals

The IT industry is booming, and there is a growing demand for IT professionals. With the widespread adoption of digital technologies, companies need skilled IT workers to help them stay ahead of the curve. As a result, there is a great demand for IT professionals and the different sub-fields within the industry.

Technology manufacturing, telecommunications, internet services, software publishing, and many other industries are part of the IT sector. There is an excellent opportunity in the field and the different sub-fields. The demand for IT professionals will only grow in the coming years.

Reasons to Use an it.com Domain Name

The it.com tld opens up the namespace:

- Choose your name. Don't just accept what's left!
- There is a bonanza of domain names for you to claim.
- Don't miss the opportunity to get whatever you couldn't get under the .COM domain name.
- Choose the name you want.
- Don't just accept what's left.
- We have simple pricing - Our suggested retail price is \$49 per year.
- Choose from an enormous range of short, one-word domain names that would cost you a fortune if you tried to acquire them under .COM.
- Do you already have a domain name? Consider *.it.com to establish your international brand.
- The it.com domain name will be easy for your audience to remember.
- Get all of the advantages of a trusted domain for SEO.

Other it.com Registration Policies

Domains may be registered in terms from 1 to 10 years

Domains can:
